Research Problem	Distributed Servers	More Handy Excel Type thing?						
https://www.youtube.com/watch?v=LKiBIGDfRU8	User devices act as collaborative servers so no centralized servers are needed	Maybe excel and sheets are already good enough though						
https://www.youtube.com/watch?v=RNDIGDINOS	Osei devices act as collaborative servers so no centralized servers are needed	waybe excel and sheets are already good enough mough						
kM&list=PLKzAYg4FejblRqlQE9PhPrB5Gt_jbRFER		Be nice maybe to have a more light weight thing. But maybe for that case you'd just want to use markdown						
Design a game to determine the best strategy for research		Maybe a markdown table editor that you can use like excel?						
Problem: research sometimes finds very useful things								
somewhat randomly or for topics not usually considered, but grant givers want to make sure their money is well spent								
opon.								
	Python Browser UI	Language Converter						
	Make or use a library for python UI's	convert code from one language to another						
	Make a browser (or browser extension?) that can run a python							
	UI							
Data Search Structure								
Data structure that hashes multiple aspects of the row or								
data. hashes in a way that more similar values are adjacent								
	Make free igcongni that tells data brokers to turn off	Porter for Pc Games to Linux, Or Other Desirability Changes For Linux						
Git merge tool for images								
- tool to visualize difference in images in git merges	Dependency Inclusion That Just makes a big old file	Java Server Sans Frameworks						
- tool to visualize unference in images in git merges	- tool to package entire project into one file that can be used in	GAVA GELVEL GALIS FLAILIEWULKS						
- useful for maintaining documentation	another project (could work for java and c++)	- try making a plain old java app without spring boot						
	- might include an easy way for users to select the methods and							
	classes they need. (though they might not know that ahead of time)	- dependency injection, endpoints, web clients,						
	uncj	- only hibernate isn't replaceable. (but can use dava)						
		- only internate shift epiaceable. (but can use dava)						
Simpler than JSON serialization?	Better File Transfer System (not having to go through google doc uis)							
Simple than 66611 contains and in	- select a file on your computer, send to destination computer							
		Internet Visualizer						
		A visualizer for the internet that uses thinks between sites to make a map						
Handy tools	Terminal Tools							
try to think of a general purpose tool like google docs or								
sheets that can be applied to various situations	Make some more terminal tools. Intellisense for coding. Easier ways to copy text from	om say the chat gpt output.						
Editor (or vs code extension) with all your files in one								
view	Terminal UI	View similar to sheets for writing down ideas and junk						
you can see all your files in a sort of giant board like that								
one ai art site. drag things around etc	- use ansi excape codes to set pixels in the temrinal	kind of top view 2d or 3d space to write down stuff, add picutres, draw etc						
	- use gpm, or xterm/rxvt/urxvt for click handling							
Wifi centralizer								
Transmiter hub that plugs into a display, communicates								
with devices and computers via Wi-Fi or Bluetooth to								
replace cords	Shared Desktop							
	- desktop can be worked on by multiple people at once							
3d Chat Room, puts your face on character	Language Learning Game							
- puts your face on an avatar	- game where learning the language give you money to get things you							
- you can mess around a little bit too	- game where learning the language give you money to get things you - want in the game. Makes the language learning like your job to get							
you can mose around a maio bit too	- a prize							
	- decorate houses, build cars, get badges or collect stuff							
Sily Party Games	accorate measure, same care, get bauges or contest stair							
- put pictures for faces of characters								
- fight each other								
- face changing stuff	Maze Game							
- rocket league kind of games	Basically a giant easter egg game							

	- falling building games
